Overvoltage and Undervoltage Earth Fault Overcurrent The 3 Most Common Faults on Inverters and How to Fix Them

Overvoltage This is caused by a high intermediate circuit DC voltage. This can arise from high inertia loads decelerating too quickly, the motor turns into a generator and increases the inverter's DC voltage. There are other causes of DC overvoltage, however. POSSIBLE FIXES: 1. Turn the overvoltage controller is on. 2. Check supply voltage for ...See more on inverterdrivesystems
