The Intech Energy Container is a fully autonomous power system developed by Intech to provide electricity in off-grid locations. Each container is equipped with a photovoltaic array, a battery bank, ...

Ideal for use in renewable power plants. Powered by lithium-ion batteries, this portable product is ready to supply reliable power in challenging situations. It can work in island mode, as a hybrid solution ...

Pre-configured solution for energy storage containers with high-efficiency cooling technology to help reduce your carbon footprint. The flexible modular concept permits simple ...

Together, these enclosures deliver 15 kW continuous (20 kW peak), operating silently and reliably even in harsh climates. Designed for telecom, data edge, industrial, and government applications, the ...

Equipped with a robust 15kW hybrid inverter and 35kWh rack-mounted lithium-ion batteries, the system is seamlessly housed in an IP55-rated cabinet for enhanced protection against water and dust, ...

The current power source is the 30kw hybrid solar wind energy system. In our limited budget and installation area, PVMARS recommends using a solar wind system. This can reduce the battery ...

This line chart presents a comparative analysis of three different 15kW container solutions across five key performance metrics: efficiency, cost, maintenance, size, and noise level.

Mobile 15 kW hybrid energy storage system with 33 kWh LiFePO₄ battery. Scalable, silent, and emission-free solution for backup, construction, and off-grid sites.

15kw 30kwh High Voltage LiFePO₄ Outdoor Energy Storage Container with Built-in 15kw Hybrid Inverter 3 Phase Solar Energy System

15kW Energy Storage Container for Mountainous Areas

The high-capacity 15KW kit features a 14.336kWh battery for extreme energy demands. With integrated LiFePO4 technology, it offers safety and longevity, perfect for off-grid or remote applications.
