China on Friday unveiled an action plan to promote the development of new forms of energy storage between 2025 and 2027, amid efforts to support green energy transition and ensure ...

Global demand for energy storage is surging. Lithium-ion leads today, but new contenders like sodium-ion, flow, and gravity systems are shaping the future grid.

The Department of Energy's (DOE) Energy Storage Grand Challenge (ESGC) is a comprehensive program to accelerate the development, commercialization, and utilization of next-generation energy ...

In terms of storage types, the dominant advantage of lithium-ion batteries continues to expand, accounting for 97.4% of the new type storage installation. Other types, such as air compression, and ...

Government Market News | Mary Scott Nabers Insights | Battery storage projects surge as utilities prepare for next grid era in 2026 | Battery storage projects nationwide are accelerating ahead ...

Here are ten notable innovations taking place across different energy storage segments, as highlighted in GlobalData's Emerging Energy Storage Technologies report.

Global renewable energy deployment continues to accelerate as large-scale solar projects, grid upgrades, and energy storage investments advance across Asia, Europe, the Middle East, ...

The acceleration of global energy storage deployment reflects a fundamental shift in power system economics and planning. Falling costs, improved technology, and more sophisticated ...

What will the year ahead bring for energy storage in the US and China? Will growth continue to accelerate in the Middle East and Europe, where government-led tenders support new ...

Global energy storage additions are on track to set another record in 2025 with the two largest markets - China

Accelerating new energy storage

and US - overcoming adverse policy shifts and tariff turmoil.
