Are solar panels worth it?

Solar panels make financial sense for most homeowners, but certain conditions maximize your return on investment. Here's when solar is typically worth it: Solar panels are a long-term investment that generate free electricity for 25-30 years. If you own your home, you'll capture all those benefits.

Do solar panels add value to your home?

According to the US Department of Energy's Lawrence Berkeley National Laboratory, solar panels can add serious value to your home and sell quicker than homes without solar. A recent study found that, based on the average home cost, homes with solar sell for 6.8% more, adding a value of around \$25,000. Solar panels can add to your home's value.

How much will solar panels cost?

Without solar panels, the average EnergySage shopper will pay about \$87,000 in electricity bills over the next 25 years, according to EnergySage data. If you install solar panels now at an average cost of \$29,649 before any incentives, you'll save about \$57,000 over the next two and a half decades.

Are solar panels a good investment?

According to the Consumer Price Index, electricity prices were up 2.8% for the 12-month period ending in March 2025. Depending on its size and your energy needs, a solar panel system can reduce or eliminate your electric bill. Residential solar panels allow you to pull less energy from the grid.
