Is it a good idea to get free solar panels?

Getting free solar panels through a solar lease or Power Purchase Agreement (PPA) can save you money on your electricity bill. The payments for the solar energy you use are typically lower than what you paid your utility company. With a solar lease, you'll be given a flat fee to pay to the solar company each month.

Can you get free solar panels from the government?

You cannot get free solar panels from the government. However, other state and federal solar programs provide homeowners with incentives to help bring down the cost of installing solar panels. The largest government solar incentive is the federal solar tax credit.

Are free solar panels a scam?

Free solar panels are not necessarily a scam, but rather a marketing tactic. Although the solar panels are free, you may have to make monthly payments to the company for the energy the panels generate.

Can I sell my home if it has free solar panels?

You can sell your home if it has free solar panels installed, but it isn't easy. Transferring solar leases and PPAs to a new homeowner is more complicated than it sounds.

Let's cut through the sales pitch: free photovoltaic panel installations aren't truly free. These programs typically operate through roof leasing agreements where companies install solar equipment at no ...

Some installation companies are offering to install solar panels for free. Find out the pros, cons and potential longterm costs of free solar.

Currently, there are no government programs that provide solar panels for free, but there are programs that provide solar photovoltaic installation or community solar options to participants, depending on ...

**Key takeaways** When you file an application for free installation of a renewable energy project, it means the company owns the panels and you pay them monthly \$50-200 or for electricity ...
