---

The solution adopts new energy (wind and diesel energy storage) technology to provide a reliable guarantee for the stable operation of communication base stations.

Our pioneering and environmentally friendly solar systems: Folded solar panels in a container frame with corresponding standard dimensions, easy to unfold thanks to a sophisticated rail system and no ...

With a capacity of 94 kWh, the energy storage system buffers the fixed power connection on site. In addition to powering the crane, it supplies other equipment, such as container units, battery-powered ...

Austria-based Solarcont has just launched Solarcontainer, a shipping container-sized device that lets you set up a mobile solar power plant just about anywhere.

Mit Leuchtturmprojekten wie Underground Sun Storage 2030 und EUH2STARS können wir das Potenzial zur großvolumigen und saisonalen Wasserstoffspeicherung schaffen und den Bergang fördern ...

We are CellCube -- technology and industry leader in the field of sustainable, future-proof and durable energy storage infrastructure. We are one of the world's first and largest developers, manufacturers ...

From rugged outdoor applications to critical emergency backup systems, Austria's portable energy solutions continue setting new benchmarks in sustainable power technology.

The off-grid version consists of a Solarfold container which, in conjunction with a suitable additional storage container, is not connected to the public power grid and functions completely autonomously.

Solarcont has developed a portable, containerized PV system featuring 240 solar modules on a folding system for easy removal and storage.
