How can Barbados speed up EV adoption?

To speed adoption, Barbados' government is offering incentives for government agencies to make the switch to EVs that best fit their mission. A new revolving loan facility will help public service vehicle operators get low interest financing so they can also make the transition to electric or hybrid vehicles.

Are electric vehicles a good choice for Barbados?

Electric vehicles can offer solutions especially suited to island nations such as Barbados and other countries throughout the Caribbean region, according to Kartik Gopal, IFC Senior Industry Specialist.

Should Barbados switch to EVs?

Barbados, a tourism-dependent economy, is firmly in this category: the economy contracted by an estimated 18 percent in 2020 and recovery has been slow, according to the World Bank. To speed adoption, Barbados' government is offering incentives for government agencies to make the switch to EVs that best fit their mission.

Are electric cars gaining traction in Barbados?

Megapower's new app allows electric car owners to scan a barcode on their phone, streamlining point-of-sale payments. Though electric cars are gaining traction in Barbados, the public transport board's electric buses are probably the most visible EVs criss-crossing the island.
