What is SK TES' new battery recycling facility in Rotterdam?

International battery recycling company SK tes is opening a new battery recycling facility in the Rotterdam port area. This facility recycles spent lithium batteries, electric vehicle batteries and battery production scrap to recover crucial raw materials.

Where can batteries be recycled?

By-products generated in the battery manufacturing process, waste electric vehicle batteries and recalled batteries can be safely processed at the SK tes battery recycling facility in Rotterdam.

Where are EV batteries recycled?

Waste EV batteries and recalled batteries will be safely processed at the SK Tes battery recycling facility in Rotterdam. As a part of the battery recycling process, SK Tes extracts black mass--an intermediate product containing rare metals such as lithium, cobalt, and nickel--that is fed back into the battery supply chain.

Where is SK TES battery recycling located?
