How many electric cars did China Export in 2023?

According to the China Association of Automobile Manufacturers (CAAM), the country exported over 1.15 million electric cars in 2023, marking a staggering 80% growth from 2022. However, in 2024, annual export growth fell to just 7%, split unevenly across destination markets.

Why are electric cars so affordable in China?

Electric car affordability improved in all car segments in China thanks to falling battery pack prices, a high level of supply chain vertical integration and fierce competition within the Chinese EV market.

What will China's electric car market look like in 2030?

The Chinese market will be key to watch: it is the largest single car market in the world, and it drives the outlook for global electric car sales in the medium term, accounting for more than half of global electric car sales through 2030 in the STEPS.

How many electric cars are sold in Latin America in 2024?

In Latin America, sales volumes and penetration rates doubled in many countries, with electric cars reaching a market share of 4% in 2024. Brazil towered over other countries in the region with nearly 125 000 electric car sales, more than twice the number of 2023 sales, and the electric sales share doubled to 6.5%.
