How much does a solar carport cost?

For a typical 5-kilowatt residential solar carport, homeowners can expect to pay approximately \$15,850 before incentives. After applying the 30% federal solar tax credit, the net cost drops to around \$11,095. Solar carports typically achieve payback periods of 8-12 years, depending on local electricity rates and solar irradiance.

Are solar carports a good investment?

Payback periods are competitive despite higher upfront costs: Solar carports typically achieve payback periods of 8-12 years with 25-year net savings ranging from \$16,500 to \$22,650, making them financially attractive long-term investments that also prepare homes for the electric vehicle transition.
