The African nations of Angola and Cabo Verde started operating large-scale battery energy storage systems (BESS) recently as part of co-located renewable energy projects.

Cape Verde is moving toward a cleaner energy future by expanding its wind capacity by 13.5 megawatts and adding 26 megawatt-hours of grid-connected battery storage.

Can desalination and energy systems be used in Cape Verde? Integrating desalination and energy systems like this could be highly beneficial. For example, on the island of S#227;o Vicente it could enable wind turbines to ...

Cape Verde has inaugurated a major expansion of its flagship Cabeolica Wind Farm, adding new wind capacity and one of Africa's most advanced battery energy storage systems (BESS), in a project ...

The project consists in the design and construction of a set of inter-related electricity generation, network and storage components during the 2023-2029 period under Cape Verde's National Electricity ...

Cape Verde has installed battery energy storage systems across four islands, Santiago, Boa Vista, Sao, and Sal. The BESS is expected to reduce the obstacles that were previously preventing people ...

Announced earlier this week (8 December), AFC and Cabeolica have officially opened the Cabeolica Wind Farm and Battery Energy Storage System (BESS) project, which comprises an expansion ...

Cape Verde inaugurated new wind and battery storage installations on Monday as part of the expansion of its Cabe#243;lica renewable energy project, backed by more than 39 million euros in financing from ...
