-----

Around a decade ago, Johnny Rogers, owner of Rogers Cattle Company, was leasing his pasture-based livestock farm in North Carolina when his landlord decided to build a 30-acre solar ...

Silicon Ranch's solution is a new system called CattleTracker. Each cow gets a tracking device. When the herd gets close, the tracker tells the solar array to reorient horizontally, letting the ...

As the U.S. beef industry spans millions of acres, cattle-solar collaboration could open vast potential for sustainable energy growth in rural communities. This next step in agrivoltaics marks ...

An Oregon Angus ranch is hosting a 120-kW agrivoltaics project using high-clearance solar trackers designed to allow full cattle grazing.

Developing solar with cattle presents a major opportunity to expand solar energy, given the vast size of the U.S. beef industry, but it also poses some significant challenges.

Oregon-based RUTE SunTracker has commissioned its first commercial solar photovoltaic project designed for cattle ranchland. The 120 kW, one-acre solar array is deployed on ...

Therefore, our team wanted to investigate the effects of shade from solar photovoltaic panels on the production, health, and behavior of pastured dairy cows. During the summer of 2018, a 30 kilowatt ...

In 2019, Silicon Ranch began exploring the opportunity to marry cattle grazing and solar generation on our land, in line with our commitment to design, build, and operate better solar farms by taking a ...

Huwa Enterprises, based in Keenesburg, Colorado, is taking a unique approach by combining solar panels with cattle grazing. The new approach to dual-use solar is being called "cattle ...

David McFeeters-Krone, a founder of Rute Foundations and developer of a cattle farming agrivoltaics project

## Cattle farm installs solar power station

in eastern Oregon, told pv magazine USA that his development, Bear Valley Solar...
