Or: Is this the only factor that causes such tragedies? In that form, the singular factor matches with the verb causes. Your sentence mixes the plural rooms with the singular factor, making ...

What causes a solar panel to fail? They found that the most common causes of early failure are junction box failure, glass breakage, defective cell interconnect, loose frame, and delamination. A study by ...

This paper demonstrates a statistical analysis approach, which uses T-test and F-test for identifying whether the crack has significant impact on the total amount of power generated by the photovoltaic ...

What is the name of the phonetic shift behind the common mispronunciation of the word nuclear (nucular)? Or, if the answer is "none", then I would appreciate learning the origin of the ...

The answer lies in those unassuming holes dotting your photovoltaic brackets. New photovoltaic bracket perforation might sound as exciting as watching paint dry, but hear me out - it's like discovering your ...

Is there a single word to qualify/describe someone that causes his own misfortune, or even a single noun that refers to such a person?

Contributory Causes appears to be the common term for those causes that, when taken together, describe multiple causes that taken individually would not produce a given result.

Fire incident in PV array initiated by hotspot failure. According to Sepanski et al., PV modules do not catch fire abruptly; fires are often sparked by critical degradation mechanisms that can be detected in ...

What is a single word, or phrase, for something that necessarily causes both harm and benefit? For example, a coal-fired power plant will harm human health through air pollution, but will ...

Causes of perforation in photovoltaic brackets

I don't understand when to use the "cause" and the "causes". What is the difference? I am writing this book review, and really need some help with this. The sentence I'm struggling with is "In both

In order to increase the heat transfer surface of PV panels, solutions such as pipes or fins made of materials with high thermal conductivity are used. The general division of passive cooling systems ...

This causes parts of the cell to become inactive within the PV module, leading to a decrease in ability to absorb sunlight and thus the power efficiency. About 50% of cracked cells have ...

The geometric configuration of the frame significantly affects the surrounding air flow and heat transfer characteristics of photovoltaic (PV) panels, thereby impacting the photo-electric ...

Meta Description: Discover the 7 critical reasons behind poor-quality photovoltaic brackets, supported by 2024 industry data and actionable engineering solutions. Learn how material ...

As the operating life of PV power plant increases, various damages may occur in the solar racking system, which directly affects the safety and power generation efficiency of the power ...

Double whammy expresses a combination of causes, but OP's asking for alternative causes, if I understand correctly.
