The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's two largest markets, the US and China, the sector ...

China's Sinopec and Denmark's Everfuel recently unveiled a hydrogen storage system that can power a mid-sized city for 72 hours using nothing but seawater and surplus wind energy.

China is currently the world's largest market for energy storage, followed by the US and Europe, according to BloombergNEF. This position was driven by a combination of market need for ...

Global battery cell oversupply driven largely by China and is set to continue China lithium-ion battery cell production capacity overlaid by global lithium-ion battery demand

A 2025 policy comparison of energy storage development across China, the United States, and the European Union. Includes regulatory trends, market impacts, and commercial storage system ...

Chinese storage providers aren't just exporting products - they're establishing new operational blueprints that European utilities are scrambling to adopt. With 56.5 GWh of global contracts secured ...

As Europe accelerates its renewable energy deployment, the need for long-duration energy storage (LDES) -- systems capable of supplying power for 4 hours or more -- is becoming ...

1 China has a goal to install 180 gigawatts of battery energy storage systems by the end of 2027, with a direct project investment of \$35.2 billion.

China and European solar and storage leaders met in Düsseldorf, Germany, this week to call for deeper cross-border cooperation as both regions confront record PV additions, rising storage...

China-Europe Electric Energy Storage System

Why should EU countries consider the "consumer-producer" role of energy storage? It addresses the most important issues contributing to the broader deployment of energy storage.
