-----

Our vision is to create one of Europe's most dynamic research alliances that brings together industry and research partners for the development of flexible and intelligent electrical ...

There are many communities in the world vulnerable to natural disasters, however, they require support and expertise to develop microgrids. Using our technical, regulatory and policy expertise on ...

The microgrid controller market in Norway is closely aligned with the country's focus on energy efficiency and sustainable energy systems. Controllers are essential for managing energy flows, ...

The result may involve smaller communities producing their own energy, utilising microgrids and island systems that are only connected to a higher-level grid for distribution and security purposes.

To achieve our Community Microgrid vision, the Clean Coalition is designing and staging numerous Solar Microgrids at critical community facilities, which will be ready to connect to larger Community ...

This paper conceptualises existing literature on community microgrids, focusing on the representation and inclusion of community preferences, needs and behaviour across the ...

Explore community microgrids for rural sustainability, ensuring energy access and resilience with renewables.

Finally, another example of present energy community initiatives in Norway is the development of microgrids in remote areas that can produce, store and share energy.

These four scenarios are used as an input to other activities in FINE project, where they are implemented in specific models adapted for the local conditions in Norway.

Operational Resilience for Microgrids Another of the projects will team NREL with University of North Carolina-Charlotte and others to integrate resilient operations into microgrid ...
