Can solar panels damage a roof?

Fortunately, roof damage from a solar panel installation is extremely rare because installers take precautionary steps while installing panels to prevent leaks and other damage. Like any home improvement project, using the right service provider is essential to a rooftop solar job.

How do I avoid solar on my roof?

Another option to avoid solar on your roof entirely is to install a ground mount or join a community solar plan and receive solar energy from an offsite location. A rooftop solar panel installation is a great investment that won't lead to roof damage when you work with a professional, experienced installer.

Do solar panels add weight to your roof?

Aside from the holes in your roof, a common concern from property owners is the added weight solar adds to your roof. In almost every case, the weight of solar panels will not compromise the structural integrity of your roof - roofs are designed to hold much more weight than might be added with 20-30 solar panels.

Should you put racking and solar panels on your roof?

Putting racking and solar panels on your roof alters one of the core parts of your home's structural makeup, and parts of the installation process put your roof at risk if done incorrectly. One of the biggest concerns for property owners is the holes needed in their roofs to secure their solar panels.
