-----

Module prices are expected to rise slightly in 2025 due to key changes in Chinese production and export policies.

The stabilization of PV module prices in October 2025 is an encouraging sign for the European solar industry, but stakeholders remain cautiously optimistic. The market is still susceptible ...

The updated guide to photovoltaic module prices shows the latest costs of solar panels across Europe. In August, high-efficiency modules dropped to EUR0.12 per watt, marking an all-time low ...

After several quarters of decline, module prices have flattened and the volatility range has narrowed. With upstream production adjustments and technology shifts underway, pricing and ...

The EU import values of solar panels and liquid biofuels in 2024 were much higher than the corresponding EU export values which were EUR0.7 billion for solar panels and EUR1.8 billion for liquid ...

PV module prices in Europe have risen after months of decline, driven by price increases from Chinese manufacturers and a tight supply of popular modules.

This stability is supported by the EU's 2030 renewable energy goals and a projected ~10% growth in PV installations, though grid delays and rising module prices - due to reduced ...

Comprehensive guide to solar module prices in 2025. Current costs, market trends, buying strategies, and price forecasts. Updated with latest data.

Average price of solar modules, expressed in US dollars per watt, adjusted for inflation.

PRICE INDEX | January 2026 Photovoltaic Price Index Every month we publish a current price index on the development of wholesale prices of solar modules. In doing so, we differentiate between the main ...
