Is energy security a new issue in Belarus?

6. Conclusion Energy security in Belarus is not a new issue, and several attempts to solve it started in the 1980s, mostly with nuclear power. However, the energy issue was conceptualized as an energy security issue in the aftermath of the "natural gas wars" in the 2000s.

Is there a law on electricity in Belarus?

The Law on Energy Savings stipulates energy efficiency technology implementation and energy-efficient equipment requirements, but there is no law on electricity in Belarus, although the government is considering drafting a law that addresses electricity sector unbundling.

What are the main objectives of energy policy in Belarus?

ved. Introduction (status of national energy sector) Energy security is one of the main objectives of energy policy in Belarus. It has a high reliance

What is the Belarusian concept of energy security?

The Belarusian concept of energy security utilizes a modified A-framework approach. Economic and political dimensions dominate; social and environmental dimensions are neglected. Renewable energy sources alone are viewed as incapable of guaranteeing energy security in a timely fashion.
