---

California now has nearly 17,000 megawatts of battery storage -- one-third of the way to its 2045 goal -- transforming how the state powers a reliable grid and robust economy, while proving ...

On the other side of the world, through Iberdrola Australia, we have put two battery storage projects into operation: Smithfield (65 MW), west of Sydney, with the capacity to store ...

New electric boilers with a capacity of 120 megawatts and an extended thermal energy storage (TES) facility were put into operation in Vaskiluoto, Vaasa, in autumn 2023.

In the second quarter of 2024, US developers put into operation 33 energy storage projects in 10 states with an installed capacity of 2.9GW. The cumulative installed capacity of energy ...

The Bollingstedt energy storage power station in Germany was officially put into operation in June 2025, and the opening ceremony was held in the presence of Tobias Goldschmidt, ...

Utilities, system operators, regulators, renewable energy developers, equipment manufacturers, and policymakers share a common goal: a reliable, resilient, and cost-effective grid.

Codes, standards, and best practices for integration and operation of energy storage support the safety of all. Safety hazards are characterized and mitigated with informed and comprehensive approaches ...

MAVIR, the Hungarian TSO, put into operation a battery energy storage system (BESS) of 20 MW in capability and a three-hour cycle.

Technological breakthroughs and evolving market dynamics have triggered a remarkable surge in energy storage deployment across the electric grid in front of and behind-the-meter (BTM).

# Electrification energy storage project put into operation

The Department of Energy (DOE) Loan Programs Office (LPO) is working to support deployment of energy storage solutions in the United States to facilitate the transition to a clean energy economy.
