This Commission department is responsible for the EU's energy policy: secure, sustainable, and competitively priced energy for Europe.

In 2024, 25.4% of all final energy consumed in the European Union was obtained from renewable sources, about one percentage point more than in 2023. This increase was largely driven ...

Financing EU instruments and guidance to spur increased investment and greater uptake, promotion and collaboration in the field of renewable energy.

Statistics on renewable energy sources in the EU cover their production and share in energy consumption.

The revised Renewable Energy Directive, adopted in 2023, raises the EU's binding target for the share of renewable energy in the energy mix by 2030 to a minimum of 42.5%.

Energy is the biggest source of greenhouse gas emissions in the EU. Find out how the EU wants to increase renewable energy and decarbonise the sector.

RePowerEU supports the green transition and limits EU dependence on Russian fossil fuels by reducing energy waste, producing clean energy, and diversifying energy suppliers.

OverviewPolicyMember statesEnergy Community countriesRenewable energy sourcesEconomicsSee alsoExternal linksThe Maastricht Treaty signed in 1992 set an objective of promoting stable growth while protecting the environment. The Amsterdam Treaty of 1997 added the principle of sustainable development to the objectives of the EU. Since 1997, the EU has been working towards a renewable energy supply equivalent to 12% of the total EU's energy consumption by 2010. The Johannesburg Summit in 2002 failed to introduce the radical changes targeted for ten years after the

Now working at the European Commission. I have first-hand experience on topics related to the energy
