Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ready battery bank.

Our OEM Solar Battery Charging Container System provides pure sine wave output inverters for efficient energy storage solutions. Ideal for industrial and commercial use, this portable lithium battery system ...

MOBIPOWER hybrid clean power containers combine battery energy storage systems with off-grid solar containers for remote industrial sites in Canada & USA.

Discover our range of innovative solar panels on shipping container products engineered to meet your renewable energy needs with maximum efficiency and reliability.

Based on an average power consumption of a 4-person household of 4000 kWh per year and a location in Southern Germany, the solar container can supply approx. 32 households with climate-friendly ...

Containerized Battery Energy Storage System (CBESS) is an important support for future power grid development, which can effectively improve the stability, reliability, and power quality of the power ...

A solar power container is a self-contained, portable energy generation system housed within a standardized shipping container or custom enclosure. These turnkey solutions integrate ...

To save a bit of money instead, you can source your own solar panels, solar charge converter, batteries, inverter, and wiring, then make it all play together.

With modular architecture and flexible scalability, it is ideal for applications like peak shaving, frequency regulation, EV charging stations, solar + storage systems, and microgrids.

Field solar container battery charging system

Transform shipping containers into battery energy storage systems (BESS). These containers can house batteries for storing excess energy generated from renewable sources such as solar or wind ...
