Explore the 2024-25 global solar panel import data, highlighting the top importing countries, major importers, and key trade trends.

U.S. consumer demand for renewable energy continues to grow, with more solar panel capacity installed in 2024 than in 2023, which saw more than in 2022. But U.S. trade policy is in flux, ...

PV energy production reached more than 10% of the world electricity consumption for the first time. The theoretical penetration rate of PV has grown across the world as capacity increases faster than ...

Explore 2025's top solar panel import trends by country, tariff impacts, and global trade shifts reshaping the clean energy market worldwide.

In that last year, the global solar PV chain reached an industrial business value of some 104.7 billion U.S. dollars, with China dominating the market, and followed by the United States and...

In 2024, the U.S. imported 54.3 GW of solar panels, mostly from ...

In 2024, the U.S. imported 54.3 GW of solar panels, mostly from Southeast Asia. Learn why the U.S. still relies on imports, key trade policies, and future trends.

In 2024, only 490 kilowatts (kW) of solar cells were imported directly from China --a minuscule amount compared to the total imports. Instead, most solar cells now come from countries ...

Public debate over tariffs on solar panels has raged for years, with solar manufacturers clamoring for higher tariffs on imported solar panels and power developers and installers, supported by foreign ...

Tariff cut sparks optimism across solar panel makers and exporters India is a major supplier of solar panels to

Foreign customers of solar photovoltaic panels

the US, with 97% of its module exports, totaling 10.4 GW, destined for the ...

The U.S. Energy Information Administration (EIA), the statistical and analytical agency within the U.S. Department of Energy (DOE), prepared this report. By law, our data, analyses, and forecasts are ...
