-----  
What is a generator enclosure?

Mobility and easy to carry: With a folding handle on top, the whole shelter can be folded to flat with steel tube frame and all four side fabric covers folded to the aluminum top cover for easy carry around and transportation. Our Generator Enclosure is designed to protect your generator in both running and storage condition from storm weather.

How can a portable generator shelter be separated from a generator?

The whole portable generator shelter can be separated from the generator with just a simple lift by the handle on top. Aluminum flat top supported by steel tube frame: Very durable metal structure against rain or snow, also more stable against side overturn due to less side surface for wind pressure.

Does a generator enclosure need a garage?

No set up or assembly required for each operation and no need garage storage. The metal structure with aluminum top supported by steel tube frame makes it a very durable and long lasting generator enclosure.

Can a GC shed fit a generator?

It fits for most of the generator with Max. power of 9.5 KW but double check your generator's L x W to make sure it is smaller than GC's 31.5" L x 27.5" W. The height of your generator can be shorter than generator shed's height since the shed can sit on the top frame of your generator and you can move the generator with the shed on.
