Energy storage has become a strategic pillar for Germany. In 2024, nearly 600,000 new stationary battery storage systems were installed in the country, according to data from the German ...

In March 2025, Germany's largest battery storage system - located in Bollingstedt, Schleswig-Holstein - was connected to the grid. It delivers 103.5 megawatts of power and has an ...

On 13 November 2025, the German Federal Parliament (Bundestag) passed an amendment to, inter alia, the Energy Industry Act (Energiewirtschaftsgesetz - " EnWG ") and the Federal Building Code ...

German government opens public consultation on new frameworks to procure energy resources, including long-duration energy storage (LDES).

Germany added 7.3 GWh of new energy storage capacity in 2025, outperforming the 5.8 GWh of new additions registered in 2024 despite a fall in the total number of battery installations.

From January to August 2025, Germany's new energy storage installations showed significant month-to-month fluctuations, largely due to changes in the pace of utility-scale deployments.

Germany's energy transition has reached a decisive moment. With more than 90 GW of installed renewable capacity already feeding into the grid -- and coal phase-out timelines ...

At the sites of the power plants in Hamm and Neurath, an intelligent, net-worked storage system is being built. Learn more about the project.

The new liquid metal battery systems from CMBlu could potentially slash long-duration storage costs by 60%. Their organic flow battery prototype (400 MWh capacity) completed successful field tests in ...

Let's face it - when you think of German engineering, you imagine precision clocks, luxury cars, and maybe

German new energy storage box

beer steins. But German energy storage companies are quietly rewriting the ...
