Germany and Japan will both pass the 100 GW mark in 2025. Global markets have seen sustained double-digit growth over the past five years; whilst 2024 "only" saw about 32% growth compared to ...

Explore the benchmarks by site size, market, and geography. Interested in discussing the results? Download the latest thought leadership, research, and industry benchmarks from the Raptor Maps ...

Net additions of global top owners' wind and solar assets reached a record high of 113 GW by Jan. 1, 2023, marking a 28% growth from the previous year. Collectively, global top 30 asset ...

The Global Solar Power Tracker is composed of worldwide facility-level data on utility-scale (1 MW+) solar photovoltaic (PV) and solar thermal facilities, as well as country-aggregated distributed (<1 ...

Data and analysis including a list of solar power in every country in the world, countries with the most solar power, and countries that generate the highest percentage of their electricity from solar power.

The worldwide growth of photovoltaics is extremely dynamic and varies strongly by country. In April 2022, the total global solar power capacity reached 1 TW, increasing to 2 TW in 2024. The top ...

With China implementing major changes to its solar market design this year, a temporary dip in global growth in 2026 appears very likely. Meanwhile, other regions are falling behind, ...

Growth in utility-scale and distributed solar PV more than doubles, representing nearly 80% of worldwide renewable electricity capacity expansion. Low module costs, relatively efficient permitting processes ...

Data and analysis including a list of solar power in every country in ...

This dashboard ranks countries/areas to their renewable energy power capacity or electricity generation. The

Global sales ranking of solar power generation

data can be further refined based on region, technology or year of interest.

Find up-to-date statistics and facts on the global solar photovoltaic industry.
