What is a high wattage solar panel?

Space Efficiency Drives Value: High-wattage panels (550W+) are most cost-effective for homes with limited roof space, providing up to 30 square feet of space savings compared to standard 400W panels for equivalent power output.

Is high definition solar a good company?

Purchased our solar system in December and they were installed in December. Very impressed with the professionalism of this company. It is rare that I worked with the contractor that runs their business in such a manner as high definition Solar. It is very clear that they are well-trained and have found themselves some great employees.
