High performance and best stability for all equipment, Free factory lay out, Machine installation, commissioning & training.

Integrated functions--layout, overlapping, and busbar ...

Designed for flexibility and precision, this system effortlessly handles various solar cell types ranging from 156mm x 156mm to 210mm x 210mm, including MBB, full-piece, half-piece, and bifacial ...

The PV module lay-up & bussing all-in-one machine integrates cell stringing layup and busbar welding into one automated system. It combines advanced automation technologies such as robotic arms, ...

PV Cell Stringer Layup Machine with Robot is used to achieve solar string automatic laying on glass EVA, and transporting module to the next process.

With pre-wired and tested components in a single enclosure, installation is faster and less complex. This "one-box" solution reduces clutter on your wall, saving valuable space in your garage ...

Designed for residential, commercial, and industrial rooftops, this self-driving photovoltaic panel laying robot combines advanced robotics, AI algorithms, and real-time sensor data to automate panel ...

Automates string welding, lay-up, and bussing with $\pm 0.20\text{mm}$ precision. Reduces labor by 90% and boosts consistency.

Integrated functions--layout, overlapping, and busbar ironing--streamline the production flow, reduce handling steps, lower space and cost requirements, and enhance overall efficiency. Seamlessly ...

The Solar Stringer Layup Machine offers precise and accurate positioning of the conductive tabs, ensuring optimal electrical performance of the solar cells. It is designed to handle various cell sizes ...

Home solar integrated machine laying

High speed and accurate lay-up with capacity of up to 600 strings/hour. The lay-up system takes the strings from the Tabber & Stringer and places them on the glass. Need help in choosing the best ...
