Step 1: Getting The Materials and Tools
Step 2: Understand The Basic Wiring Setup
Step 3: Connecting and Wiring Solar Panels
Step 4: Connecting Solar Panels to The Charge Controller
Step 5: Connecting The Battery to The Charge Controller
Step 6: Connecting The Charge Controller/Inverter to The AC Load
Step 7: Ensure Grounding and Surge Protection
Step 8: Install A Monitoring System
Step 9: Test Your System

Before you can begin assembling your DIY solar panel system, you'll need to gather the essential materials and tools. Here's a list of items you will require to complete this project: 1. A solar panel 2. A 12V battery 3. A 10A, 12V DC charge controller with a built-in inverter 4. Cabling and connectors to connect the solar panel and the battery to ...
