For a site survey for solar PV installation you document roof geometry and condition, azimuth and tilt, shading and obstructions, structural particulars, electrical service and preferred equipment locations.

Below is a practical, step-by-step guide you can use in the field -- with the tools, measurements, a worked example, and common FAQs.

Discover the features that make the best solar site survey tools stand out and how they help improve this critical step in the solar installation process.

Now that you know who should be involved in your site survey, let's look at a few fundamental project components you need to keep in mind. Although this is not an exhaustive list, it's a good place to ...

Learn how to use solar mapping tools to efficiently conduct site surveys, optimize solar panel placement, and maximize energy production. This guide explains how these tools help solar professionals design cost ...

The site survey is your opportunity to gather all the information essential for the solar PV system design, permitting, and interconnection process. You will inspect the roof and electrical panel, look for trees ...

Begin with detailed photos of the main service panel and electrical meter. These images provide critical information necessary for designing a compliant and efficient system. Clear documentation of labels ...

For US solar installers and EPCs operating in this booming market, mastering site assessment isn't just about avoiding costly mistakes--it's about maximizing returns and ensuring long-term project success.

Step-by-step guide to conducting a solar PV site survey with tools, examples, and expert tips.

Main objective of a site survey is to gather customer details, site measurements and detailed requirements for

How to investigate photovoltaic panel areas in the third survey

solar installation project. All these details are very important for the solar project proposal.

The site survey is your opportunity to gather all the information essential for the solar PV system design, permitting, and interconnection process. You will inspect the roof and electrical panel, ...
