How much do integrated solar panels cost?

Installing integrated solar panels for an average 3-bedroom home costs somewhere between $\$5,000$ - $\$6,000$. With such an installation, you can expect savings of up to $\$660$ per year on your electricity bill. If you're looking to seamlessly blend form and functionality, then installing integrated solar panels might be a great option for you.

How much does a solar panel cost?

Note: Costs are expressed in constant 2024 US\$ per watt. Global estimates are used before 2010; European market benchmarks thereafter due to limited data availability. Solar photovoltaic module prices refer to the cost of the solar panel itself, and do not include installation or other system components.

Are integrated solar panels worth it?

It's a great look for any style of house. Although they were once much more expensive than on-roof panels, integrated solar panels are now pretty affordable- great news, since 69% of people ranked cost as the most important factor when evaluating which low-carbon product to purchase.

What are integrated solar panels?

In essence, integrated solar panels are the same as traditional solar panels. They absorb sunlight and convert it into usable electricity for your home. The difference is that instead of being mounted on top of your roof, they are built into its structure. This is done by replacing a section of your roof's materials with solar panels.
