In NSA networking, 5G base stations cannot be deployed independently, requiring LTE base stations to be used as anchor points on the control plane for access to the core network.

Swisscom told Fierce last year that there is no rush for standalone 5G because the operator is able to serve all its current customer use cases with its NSA 5G network.

He announced that Swisscom had selected AWS as its preferred public cloud provider for its enterprise IT. And he said Swisscom would also work with AWS to build its 5G core in the cloud.

o The target of 5G+ coverage of ~90% by 2025-2026 is really ambitious for Swisscom (and competitors).

Ericsson and Swisscom, the largest telecommunications service provider in Switzerland, have switched on the first large-scale commercial 5G network in Europe to support commercially available ...

Swisscom provides 5G mobile coverage to 99% of the Swiss population. The very first generation of 5G devices only supports one frequency band with 5G (N78, 3.6 GHz), so these devices can only use 5G+.
