U.S. Distributed Solar and Storage Data Berkeley Lab collects, cleans, and publishes project-level data on distributed* solar and distributed solar+storage systems in the United States. The data are ...

Learn how data analytics can help energy storage operators optimize their systems, reduce costs, and improve overall performance. Discover the latest trends and techniques in data ...

The DOE Global Energy Storage Database provides research-grade information on grid-connected energy storage projects and relevant state and federal policies. All data can be exported to Excel or ...

In support of this challenge, PNNL is applying its rich history of battery research and development to provide DOE and industry with a guide to current energy storage costs and performance metrics for ...

Search or sort the table below to find a specific data source, model, or tool. For additional resources, view the full list of NLR data and tools or the NLR Data Catalog.

Analytics software can help reduce the cost of storage projects even before installation through processes known as modeling and digital commissioning.

The following resources provide information on a broad range of storage technologies.

Energy Storage Pro, a data and analytics subscription platform, provides access to on-demand direct-from-supplier pricing, product and supplier data, lifecycle cost, capacity maintenance, ...
