Kazakhstan's Ministry of Energy and China Energy Engineering Group have signed agreements on the construction of a large solar power plant with a capacity of 300 MW in the Sauran ...

Explore the 545 MW Altyn Dala Solar Power Station, a key project advancing Kazakhstan's renewable energy expansion and solar capacity goals.

This project marks a promising chapter in Kazakhstan's energy transition journey -- and a milestone in cross-border green energy partnerships.

Currently, Kazakhstan operates a 7.5-megawatt (MW) pilot energy storage system at a substation in Kokshetau. The facility is being used to test how storage systems interact with the grid.

Discover how energy storage systems are transforming Kazakhstan's power generation landscape while addressing renewable intermittency challenges.

Samruk-Energy JSC, in partnership with Chinese company Energy China, has launched construction of a 300 MW solar power plant with an energy storage system in the Turkestan region. ...

It is reported that the project plans to construct a 300 MW photovoltaic system and a 90 MW/360 MWh energy storage system. Upon completion, it is expected to provide approximately 674 ...

As part of the implementation of the instructions of the President of the Republic of Kazakhstan, Kassym-Jomart Tokayev, delivered on 28 January 2025 at an expanded meeting of the ...

Government measures, implemented through the Ministry of Energy, are focused on increasing installed capacity, launching large-scale modernization and new generation projects, and ...

Kazakhstan solar energy storage power generation project

In April, Kazakhstan held its first auctions for large wind power projects, including storage systems. State support remains a key driver of growth in the sector.
