The lamination process consists of sealing all the interlayers inside the panel. The correct lamination process renders a better product in terms of quality and longevity.

The ECOLAM SERIES is a range of fully electric laminators engineered for high-quality lamination of solar panels. Designed to facilitate the polymerization of encapsulant materials, these laminators ...

Horad provides two types of quality solar panel laminators, double layer and three chamber laminators and double layer and double chamber laminators. The laminating machines adopt cutting-edge ...

As solar deployment expands worldwide, advanced laminators--such as the Three Chamber Laminator, Double Layer & Double Chamber Laminator, and Auto Laminator--are ...

Our Solar PV Module Laminator is a high-precision, energy-efficient system designed to encapsulate solar modules under controlled temperature, vacuum, and pressure conditions.

Whether small, medium or large capacities, our laminators are the technological benchmark on the market. Thanks to continuous further development based on years of process experience, we offer ...

SupoSolar's solar panel laminators are essential machinery for PV module production, bonding layers like EVA, glass, solar cells, and backsheets under controlled vacuum and heat conditions.

Discover what a solar panel laminator is and why it's crucial for manufacturing. Learn about the process, types, and key components for durable solar panels.

One of the most critical machines in the production line is the solar laminator. This machine ensures that the layers of photovoltaic (PV) modules--glass, EVA (ethylene-vinyl acetate), ...

Main models include single-, double-, and three-layer structures with one to three chambers, and offer either

Laminator for photovoltaic panels

oil or electric heating. All configurations can be customized to meet customer requirements. ...
