What is a portable power station?

A truly portable power station will be light and small, but it won't be able to do as much as the huge ones. It all depends on what you need. The smaller power stations are usually great at charging phones, tablets, powering small appliances, etc.

Are portable power stations expensive?

Updated December 2025: We've added power stations from Bluetti, Anker, Jackery, and DJI, and an honorable mention for an Ampac power station. Portable power stations can be very expensive, but discounts, sales, and deals are common. If you can afford to wait, you can likely get your chosen power station for less than the listed MSRP.

How long does a portable power station last?

A portable power station's lifespan depends on the type of battery inside. Most new portable power stations, including all the models we recommend here, feature LiFePO4 battery technology, which lasts far longer than older lithium-ion technology. How much more? LiFePO4 power stations will last for more than 3,000 charge cycles, or about 10 years.

How much power does a portable power station hold?

On the small end, portable power stations hold around 300 Wh (like the little EcoFlow River 3 Plus, our Best Budget pick). These little ones are generally smaller than a lunchbox and good for tasks like recharging laptops and speakers, LED lighting, and small fans.
