The Italian government has authorized eight BESS projects that will strengthen the stability of the power grid. Companies such as Edison Next and GreenGo stand out in this initiative.

The scheme notified by Italy will support the construction of electricity storage facilities with a joint capacity of more than 9 GW/71 GWh. The scheme will run until 31 December 2033.

Zelestra and BKW have signed an innovative long-term tolling agreement that enables the delivery of one of Europe's largest battery energy storage systems (BESS), of up to 2 GWh, in ...

In December 2023, the EU approved Italy's EUR17.7 billion energy storage plan, aiming to build more than 9 GW/71 GWh of storage systems by 2033, with strategic plans for utility-scale storage in southern ...

By implementing large-scale electricity storage facilities, the Italian scheme aspires to reduce energy reliance on fossil fuels and foster a resilient grid, prepared to handle fluctuations in ...

The scheme totalling EUR17.7 billion (US\$19.5 billion) will provide annual payments covering investment and operating costs for those developing, building and operating large-scale ...

The Danish infrastructure investor has joined hands with GCSS to develop the pipeline of large-scale, standalone battery energy storage projects across both northern and southern Italy.

“Today we have realised several projects in the country, including two large plants operating in Piedmont and Veneto, with a total capacity of 40MW.

The large-scale storage project is part of Galileo's Italian development pipeline, which currently includes over 3 GW of onshore wind, solar PV, BESS (Battery Energy Storage System) and ...

Large-scale energy storage projects in Italy

Italy has taken a major step forward in its energy transition efforts, giving the green light to 361 MW of new battery energy storage systems (BESS) spread across three regions--Lazio, Puglia, ...
