Chinese photovoltaic products have been exported to more than 200 countries and regions around the world, becoming an important support for global energy transformation. In the ...

Under his leadership, LONGi has grown from a start-up into a global PV technology leader, achieving breakthroughs in areas such as wafer and cell/module efficiency improvements, ...

During his keynote speech, Li Zhenguo emphasized that in response to the global energy transition, evolving international dynamics, and shifting industry cycles, China's photovoltaic...

China-based LONGi Group President Li Zhenguo said that within ten years, photovoltaic plus energy storage will become the cheapest energy solution. He was speaking at the 9th China ...

He believes that the next frontier for solar energy lies in technological breakthroughs such as hydrogen production, energy storage, and smart grids. LONGi has already begun investing in ...

Li Zhenguo: The physics principle is straightforward: front-side grid lines obstruct sunlight. By relocating electrodes to the backside, BC cells eliminate shading losses, boosting ...

During the "Checking In on the Energy Transition" roundtable at the Summer Davos Forum, Li Zhenguo (Founder of LONGi, President of its Central R& D Institute) engaged in ...

The initiative urges photovoltaic and energy storage companies to boost independent innovation by increasing R& D investment and encouraging researchers to explore new technologies ...

On February 27, 2025, Li Zhenguo attended the China Photovoltaic and Energy Storage Original Technology Forum in Suzhou and emphasized the importance of independent innovation and the ...

Li Zhenguo Photovoltaic plus energy storage

The initiative calls on photovoltaic and energy storage enterprises to enhance their independent innovation capabilities, increase R& D investment, encourage scientific researchers to ...
