---

This MOBILE serie is an extremely efficient mobile energy storage trailer with a high capacity and a unique way of charging. The Mobile trailer can be used as a power supply during mains fluctuations ...

Liquid-cooling integrated mobile energy storage vehicles are advanced power solutions that combine energy storage systems with liquid cooling technology. These vehicles efficiently store ...

The energy storage charging system employs LFP battery for energy storage and through the local and cloud EMS, it helps balance the power supply and demand among the grid, battery, ...

Built at the Marseille-Fos Port, the marine geothermal power station Thassalia is the first in France, and even in Europe, to use the sea's thermal energy to supply linked buildings with power for heating and ...

The vehicle is equipped with an 800 kW PCS and supports 120 kW\*2 ultra-fast liquid-cooled charging, capable of simultaneously recharging up to two electric vehicles.

Power Edison partnered with industry leaders and developed our patent-pending TerraCharge(TM) platform built on reliable and proven equipment. Our systems serve utilities, commercial/industrial ...

Nicknamed the "super power bank" by industry insiders, the Xinjiyuan 2000 sets a new standard in mobile energy solutions with its advanced safety architecture, cutting-edge liquid cooling ...

The CIMC-MEST Energy Storage Vehicle (MESV) uses batteries as energy storage with a PCS system, featuring mobility, eco-friendliness, and flexible power supply for EV ...

Chinese energy technology company Sunwoda has introduced the world's first 10-meter-class, 2MWh liquid-cooled mobile energy storage vehicle at ESIE 2025.

# Liquid-cooled mobile energy storage power supply vehicle

The 5MWh liquid-cooling energy storage system comprises cells, BMS, a 20"GP container, thermal management system, firefighting system, bus unit, power distribution unit, wiring harness, and more.
