Each outdoor cabinet is IP56 constructed in a environmentally controlled liquid cooled cabinet including fire suppression. Multiple 373kWh cabinets can be installed together creating up to 4472kWh energy ...

Our system is designed to enhance energy density and thermal performance, accelerate installation times, engineered for optimal serviceability, and minimizing capital expenditures (CAPEX).

The liquid cooling battery cabinet is a distributed energy storage system for industrial and commercial applications. It can store electricity converted from solar, wind and other renewable energy sources.

CHAM has been focus on new energy core technology for 20 years, providing customized products and services to customers with its professional pre-sales and R& D teams.

Our liquid-cooling energy storage cabinet is engineered for high-efficiency, scalable ESS solutions. It combines top-tier LiFePO4 cells, advanced liquid cooling, and AI-powered safety features to ensure ...

Maximize power reliability & savings with our 125KW/261KWH Liquid-Cooled Battery Cabinet. Featuring superior cooling efficiency for extended 10-year lifespan, it enables critical equipment UPS protection ...

Fire Fighting Mode: PACK-level perfluorohexane+cabin-level aerosol+water fire suppression Storage Ambient Temperature: -30?~60? Altitude: 4000 (>2000 derated operation) Keywords: 261kWh ...

Ranging from 208kWh to 418kWh, each BESS cabinet features liquid cooling for precise temperature control, integrated fire protection, modular BMS architecture, and long-lifespan lithium iron phosphate ...

Featuring flexible AC/DC design, precision liquid cooling, and cloud-enabled management, it delivers high efficiency, robust safety, and reliable performance across diversified application scenarios. High ...

Liquid cooling energy storage cabinet pack

The eFlex 836kWh system is designed to fit into even the most compact spaces. With an energy density of 98.4kWh/m³; and a footprint of just 3.44m², it offers a high-performance solution that maximizes ...
