J.P. Morgan's recent analysis shows that shipments of stationary energy storage batteries will rise by 50% in 2025 and 43% in 2026. This surge is causing the lithium supply to move ...

According to the data presented in the paper, the global shipment volume of lithium-ion batteries in 2024 reached 1,545.1 GWh, marking a year-on-year increase of 28.5%. From the ...

In 2023, energy storage (ESS) battery shipments hit a new high of nearly 204 GWh, or 18.5% of total battery shipments, and rose to 72.6% year-on-year. Over the forecast period, ESS ...

Interact Analysis forecasts global lithium-ion battery shipments will exceed 3.5 TWh by 2029, driven by EVs and energy storage demand.

According to InfoLink's global lithium-ion battery supply chain database, energy storage cell shipment reached 114.5 GWh in the first half of 2024, of which 101.9 GWh going to utility-scale ...

Li-ion Battery Market Demonstrates Strong Growth, Driven by Energy Storage Shipments. Rates of growth are expected to increase year-on-year; with battery shipments rising by 23% in 2024 ...

Global shipments of electric vehicle (EV) power batteries and energy storage batteries surged in 2024, and could continue growing until 2030, according to Chinese research institution EV Tank.

Chinese energy storage battery companies performed exceptionally well, achieving record-breaking global shipments. CATL maintained its leading position for consecutive years, while ...

According to the latest Li-ion Battery and Manufacturing Equipment - 2024 report from Interact Analysis, the global lithium-ion battery market experienced a substantial 38.8% year-over ...

Lithium-ion energy storage battery shipments

22 Global energy storage company HiTHIUM has secured a position among the top two global energy storage battery suppliers in 2025, according to shipment rankings released by ...
