Who is little sun?

To design and deliver affordable clean energy solutions A marriage of art and science, Little Sun was founded in 2012 by artist Olafur Eliasson and engineer Frederik Ottesen. Their collaboration produced the Little Sun lamp--a small, portable, solar light--that was first distributed to people living without electricity in Ethiopia.

How does little sun help smallholder farmers in Zambia?

Little Sun powers smallholder farmer productivity in rural Zambia. Little Sun Community Energy Hubs enable smallholder farmers to sell their milk for collection by national dairy companies. Little Sun's agritech offer in the Chibombo province provides farmers with:

What does little sun do?

Little Sun has worked with humanitarian aid agencies to distribute solar devices to refugees, internally displaced people, and host communities in Ethiopia, Greece, Nepal, Niger, Rwanda, South Sudan, and Ukraine among others. We know that every problem requires a different solution.

What is the little sun lamp?

Their collaboration produced the Little Sun lamp--a small, portable, solar light--that was first distributed to people living without electricity in Ethiopia. The lamp is a practical tool that enables students to study after dark, mothers to take better care of their children at night, and families to reduce the effects of toxic fumes from fuel.
