Will Chile be able to develop energy storage projects in 2024?

In 2022, Chile passed an energy storage and electromobility bill, which made stand-alone storage projects profitable, but the market is still expecting new rules on capacity payment for storage projects, which are to be approved in 2024. Chile has also put in place an auction procedure to award public land for the development of BESS projects.

How many energy storage projects are in Chile?

Currently, 36 of the 129 large-scale projects Latin America projects with an energy storage component under development are in Chile, including 32 out of 71 of the region's early works projects. The storage technologies either in use or being considered include:

How much battery storage capacity does Chile have?

According to data from Acera, the Chilean Renewable Energy Association, there are only 64 MW of battery storage capacity currently active, representing 0.2% of national capacity. AES Andes, a subsidiary of U.S. company AES Corp. operates all 64 MW at their Angamos and Los Andes substations.

Are battery energy storage systems a viable alternative for Chilean power producers?

With transmission lines at overcapacity and permitting delays slowing the development of new grid infrastructure, battery energy storage systems (BESS) have surged as a profitable alternative for Chilean power producers.

Chile has emerged as a world leader in hybrid systems and standalone energy storage since implementing its Renewable Energy Storage and Electromobility Act in 2022. Ensuring projects ...

The projects developed by AES Andes will be located in the Antofagasta region of Chile. It will feature a wind farm with an installed capacity of 140 MW and a 252 MW photovoltaic park, ...

Why Chile's Latest Tender Is a Big Deal for Renewable Energy Buffs If you're in the energy storage game, Chile's 2025 tender announcement is like spotting a rare bird in the Atacama ...

With transmission lines at overcapacity and permitting delays slowing the development of new grid

Low-Temperature Type Energy Storage Cabinet for Wind Power Storage in Chile

infrastructure, battery energy storage systems (BESS) have surged as a profitable ...

The Situation Chile, a nation of approximately 20 million people, is embarking on an ambitious journey toward a more sustainable energy future. With a historically fossil fuel-dependent ...

The project is Atlas Renewable Energy's first foray into battery storage technology, which the company sees as essential for increasing the share of renewable energy sources in the power ...

The sharp growth in renewable energy production, and the pursuit of ambitious global targets on new capacity, bring with them a significant challenge, alongside huge potential for the ...

Chile's goal to achieve 80% renewable grid by 2030 and a 100% zero emissions grid by 2050, will require an estimated 2,000 MW of energy storage every 10 years.

The renewables arm of energy firm Enel has started work on a project combining wind turbines and a 34MW battery storage system in Chile.

Curtailed solar PV and wind has continued to increase in Chile last year and passed 6TWh, up 8% year-on-year, according to ACERA.
