National Portal for Rooftop Solar - Ministry of New and Renewable Energy

In 2024, generators added a record 30 GW of utility-scale solar to the U.S. grid, accounting for 61% of capacity additions last year. We expect this trend will continue in 2025, with 32.5 GW of new utility ...

On this page you'll find resources to learn what solar energy is; how you, your business, or your community can go solar; and find resources for every step of the way.

The database combines datasets from the U.S. EIA, the Environmental Protection Agency (EPA) and the National Renewable Energy Laboratory (NREL). The locations and array boundaries of all ...

The Solar Program is executing the Solar America Initiative by working with industry, national laboratories, universities, and other members of the solar energy community.

Renewables, including solar, wind, hydropower, biofuels and others, are at the centre of the transition to less carbon-intensive and more sustainable energy systems. Generation capacity has grown rapidly ...

NLR's solar energy research leverages our expertise--from materials to systems to commercialization--to continually improve the affordability, performance, and reliability of this ...

Founded in 2001, ACORE is a national organization that "unites finance, policy and technology to accelerate the transition to a renewable energy economy." Their website describes the ...

Concentrating solar power (CSP) projects in United States are listed below alphabetical by project name. You can browse a project profile by clicking on the project name. You can also access ...

SEIA is engaged with policymakers to establish a competitive solar market and offer cost-competitive, reliable energy to consumers. Companies across the United States are investing in record-levels of ...
