Discover SolarNL, the groundbreaking initiative led by AMOLF at Amsterdam Science Park, aiming to transform the Dutch solar industry with innovative technologies and sustainable ...

We have made significant steps in recent years, by advocating for the long-term use and reuse of solar panels and actively working to establish a second-hand market. By doing so, we aim ...

"We at Solarge are seeing a very large demand for lightweight solar modules. The production plant in Weert in The Netherlands which will be extended to 400 MW in 2024, is a first step in our ambition to ...

The Dutch government has drafted a public proposal to support the production of heterojunction and perovskite-silicon tandem modules, as well as building- and vehicle-integrated PV ...

It aims to build up a strong PV cell and module manufacturing industry in the Netherlands and is financed publicly and privately. The energy transition must accelerate and become more ...

SolarNL helps to create the necessary innovative PV technologies and industrial basis in the Netherlands for decades to come. With this program we are building a strong PV industry that ...

The expected surge in discarded solar panels, combined with innovative technologies and a fair market environment, will help shape a circular, greener future for the solar energy sector.

Building a solar factory in the Netherlands? Navigate complex environmental laws with our clear guide on permits, emissions, REACH, and WEEE compliance.

The MCPV project is designed to significantly elevate Europe's collective capacity within the solar industry and related supply chains, utilising advanced digital manufacturing technologies, ...

Netherlands Environmentally Friendly solar Module Processing Project

Ambitious collaboration between companies and research institutes for large-scale production of circular integrated solar cells and panels from the Netherlands.
