-----  
Is energy storage expanding?

Jason Grumet, CEO of ACP, said, "While all clean energy technologies are expanding their market share, energy storage is expanding at an astonishing rate. According to data from ACP and Wood Mackenzie, in the first quarter of 2024, the installed capacity of utility-scale energy storage in the United States increased by 84%.

How many energy storage projects are there in 2024?

According to data from ACP and Wood Mackenzie, in the first quarter of 2024, the installed capacity of utility-scale energy storage in the United States increased by 84%. In the second quarter of 2024, US developers put into operation 33 energy storage projects in 10 states with an installed capacity of 2.9GW.

Is US energy storage set a Q1 record in 2025?

US energy storage set a Q1 record in 2025 with 2 GW added, but looming policy changes could put that growth at serious risk.

How many energy storage projects are there in the United States?

The cumulative installed capacity of energy storage in the United States exceeded 20GW and reached 21.6GW. Among them, 18 energy storage projects are supporting the construction of photovoltaic or wind power facilities, and the other 15 are independent energy storage.

Utility-scale battery storage in the United States is poised to more than double over the next two years and will close out 2026 at nearly 65 GW -- a rapid rise from 17 GW in the first quarter ...

US energy storage installations grow 33% year-over-year Storage deployment in the United States grew across all segments and is forecast to grow another 25% in 2025, according to ...

After several record-breaking years, the U.S. clean energy sector faces a critical moment. Solar deployment and electric vehicle (EV) sales broke records in 2023 and 2024. ...

More than half of the new utility-scale solar capacity is planned for three states: Texas (35%), California (10%), and Florida (6%). Outside of these states, the Gemini solar facility in Nevada ...

# New Energy Storage Explodes in the United States

The energy storage industry in the United States is currently experiencing a significant transformation. Groundbreaking technologies and innovative companies are redefining how energy is ...

Utility-scale leads with 4.9 GW, 63% YOY growth Residential installations rise 8% QOQ Headwinds could result in 10% drop in installations for utility-scale in 2027 Houston/WASHINGTON, ...

The report shows that in the second quarter of 2024, the United States added 11GW of new utility-scale photovoltaic, energy storage and wind power installed capacity, a year-on-year ...

The battery storage market in the United States is undergoing a remarkable transformation. In the first half of 2024, the U.S. power grid added 4.2 gigawatts (GW) of battery ...

Energy Storage Reports and Data The following resources provide information on a broad range of storage technologies. General U.S. Department of Energy's Energy Storage Valuation: A ...

US energy storage set a Q1 record in 2025 with 2 GW added, but looming policy changes could put that growth at serious risk.
