Occidental Arts & Ecology Center (OAEC), in partnership with RE-volv and Vital Energy Solutions, recently installed a 124-kW solar and 540-kWh battery storage system at their 80-acre ...

Trina Solar has officially commissioned its integrated photovoltaic (PV)-storage-charging-discharging microgrid demonstration station at its headquarters campus.

The Arlington Microgrid and Clean Energy Center project introduces new technology for grid resiliency and renewable energy integration. It includes: What is a Microgrid? A microgrid offers a unique ...

This pilot project, recommended by the PowerPath DC Pilot Projects Governance Board, seeks to modernize the District's energy distribution system by implementing a neighborhood-scale microgrid ...

MSL organized and is coordinating a Long Duration Energy Storage Research and Demonstration Pilot Project focused on innovations in flow battery technology.

Seven EPIC-funded microgrid projects funded in 2015 recently concluded their three-year implementation timelines. These seven projects demonstrated low-carbon-based microgrids for ...

Sumitomo Electric Industries, Ltd. conducted a microgrid demonstration project on an actual power distribution grid using its redox flow battery (RFB) in collaboration with Japan's New ...

Federal programs, institutions, and the private sector are increasing microgrid development and deployment. The number of successfully deployed microgrids will verify benefits and decrease ...

This demonstration home by SoCalGas is a first of its kind, using solar, storage, an electrolyzer, and the Generac ARC microgrid controller to convert solar energy to hydrogen.

New Energy and Microgrid Demonstration Project

This demonstration project using a RFB system has been highly evaluated as one of the global best practices that can contribute to ensuring the grid resilience and should be shared with the ...
