The three main dispatchable sources of electricity generation (natural gas, coal, and nuclear) accounted for 75% of total generation in 2025, but we expect the share of generation from ...

Solar accounted for 58% of all new electricity-generating capacity added to the US grid through the third quarter of 2025, with more than 30 GW installed. Solar and storage, combined, ...

The Middle East and North Africa forecast has been revised up by 25%, the biggest regional upgrade, due to rapid solar PV growth in Saudi Arabia. In Southeast Asia, solar PV and wind deployment is ...

Blue Star Power Systems | A power generation systems integration specialist manufacturing complete custom diesel and gaseous driven generator sets.

The Nature's Generator 1800/1440-Watt Platinum Generator System is comprised of two natural ways to generate free electricity - solar and wind power. The platinum system brings together ...

The previous editions and complete electricity generation and capacity dataset from 2000 onwards are available for download on the Data and Statistics web pages.

Explore the new Beta version with expanded plant level data for water cooling and emissions.

The NREL datasets produced for the PERFORM project are intended to provide researchers with access to realistic load, wind, and solar forecast data at high resolution.

Find and download resource map images and data for North America, the contiguous United States, Canada, Mexico, and Central America. View an interactive map or download ...

It includes corresponding PV facility information, including panel type, site type, and initial year of operation.
