The solar energy company Endra has recently made the investment decision to develop HIM Solar Power Plant. The project is Norway's first large-scale solar power plant on a landfill site, and the very ...

Solar developer Energeia AS has been granted a license to build, own and operate a 46 MW agrivoltaic project in Norway, set to become the country's largest solar site to date.

Norwegian renewables developer Solgrid announced on Monday it is set to build a solar farm at home that will be capable of supplying 15 GWh of clean power annually once operational.

Norway's strategy aims to integrate solar energy into a diversified renewable portfolio, where it complements the nation's vast wind and hydropower resources. By increasing the share of ...

In this article, the technical potential of solar power on buildings in Norway is assessed by estimating the available roof and wall area suitable for the installation of solar cells.

The project is Norway's first large-scale solar power plant on a landfill site, and the very first major solar power plant in Western Norway. In June 2024, the project received a 30-year operating permit from ...

With thoughtful planning and modernisation, Norway could transform its urban landscape into a decentralised, low-carbon power network--one that empowers citizens, reduces emissions, ...

The potential is large, but it will only be unlocked with favourable framework conditions. This article analyses how Norway's regulatory landscape for solar energy is changing rapidly.

This target encompasses both small-scale rooftop installations and large utility-scale solar power plants, though the share between them is undetermined. This article analyses current ...

Significantly, the Raufoss Solar Power Plant will be constructed on a 200-decare plot of land previously used

Norway has a solar site replacement

for waste disposal and landfill activities. This demonstrates a forward-thinking ...
