---

Our cabinets are built to withstand harsh weather conditions and provide excellent protection for power management systems, telecom base stations, energy storage battery systems, and radio equipment.

By combining thermal regulation with physical security, these cabinets protect sensitive network assets in unmanned locations while ensuring continuous service availability.

These cabinets are constructed using high-quality materials and fortified with secure locking mechanisms, tamper-evident seals, and intrusion detection systems to deter unauthorized entry.

Whether you need a compact fiber distribution unit or a large UPS enclosure, each outdoor telecom box can be configured to support integrated power, fiber optic, and data systems within our facility.

An outdoor telecom enclosure is a specialized cabinet designed to house and protect telecommunications equipment in outdoor environments. These enclosures ensure that critical ...

Designed to save deployment cost and time, our innovative solutions include hub collapse, battery backup, composite mounting platforms and modular series cabinets. Modular capability helps future ...
