Is Pakistan tapping into solar power at an 'unprecedented' rate?

Pakistan is tapping into solar power at an 'unprecedented' rate. Here's why Solar panels on the rooftops of houses in Islamabad. Pakistan is in the midst of a solar boom that solar analysts describe as 'unprecedented.'

How much does solar cost in Pakistan?

This became apparent last year, when solar imports to Pakistan more than tripled from just one year earlier, approaching \$2.1 billion, according to data from Renewables First, an energy and environment think tank in Islamabad.

Should Pakistan invest in solar panels?

Solar panels are proliferating in Pakistan. Pakistanis around the country are already weighing the benefits of investing in solar. Dilawar Khan, who does small jobs for a local business and whose wife works as a housekeeper, says he is saving to buy a single solar panel. That would help run the air cooler that sits in the courtyard of his house.

How many solar panels did Pakistan import in 2024?

It imported 17 gigawatts of solar panels in 2024, more than double the previous year, making it the world's third-biggest importer, according to data from the climate think tank Ember. Pakistan's story is unique, said Mustafa Amjad, program director at Renewables First, an energy think tank based in Islamabad.

Glimmering, deep-blue solar panels carpet rooftops in Pakistan's largest cities and dot the perimeters of houses in villages across the country. Pakistan, home to more than 240 million people ...

Pakistan is undergoing a rapid energy shift resulting in photovoltaic energy adoption among different consumer classes. The Great Solar Rush in Pakistan by Renewables First explores this ...
